## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the references of record neither reveal nor render obvious the recited combination including, for claims 1-5 and 17-23, a plurality of  $\Sigma\Delta$  modulators operating on charge packets in a measurement circuit having shared elements, and, for claims 6-16 and 24-34, a measurement circuit having first and second charge packet integrating converters coupled to a shared elements by means of switching logic.

U.S. Patents 6,720,777 and 6,684,711 to Wang disclose measurement circuits having a pair of sensing capacitors coupled to a  $\Delta\Sigma$  converter [12]. U.S. Patent 4,791,352 to Frick et al describes a measurement circuit with charge packets coupled to a capacitive sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
